TECHNOLOGY

BEGINNING OF A NEW ERA
OF 4D TECHNOLOGY

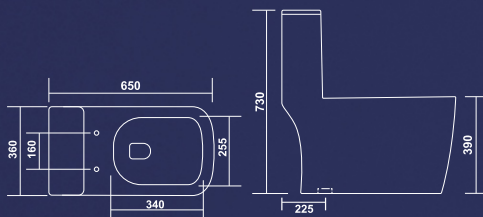

A rimless toilet is simply a toilet without a traditional rim. Instead of water flowing into the bowl all the way round the rim, a direct flush technique shoots water around the edge of a smooth pan. As there is no rim, rimless toilets are easy to clean and more hygienic than a traditional toilet.

HOW IT WORK

- * Large water surface offers easy cleaning
- * Extra large siphon jet for maximum power
- * Elegant skirted design offers easy cleaning
- * Large computer designed, fully glazed trap way reduces clogging
